

# Firestore and their product quotas

Firestore offers a free **Spark plan** that includes generous limits to get started.

## **What's included with the Spark plan?**

The Spark plan includes the following access to services:

- Full usage of the no-cost Firestore products and features
- No-cost usage quotas for paid Firestore products

## **Important facts to remember about the Spark plan**

- If you exceed the no-cost quota limit in a calendar month for any product, *your project's usage of that specific product will be shut off for the remainder of that month.*
- To use that specific product again, you'll need to wait until the next billing cycle or upgrade to the Blaze pricing plan.

## **No-cost Firestore products**

No matter which Firestore pricing plan your project uses, you get full usage of the following Firestore products at no charge — even in your production apps and even *if you have several million users!*

A/B Testing	Cloud Messaging (FCM)
App Check	Crashlytics
App Distribution	Dynamic Links
Authentication (most options)	Firestore ML (model deployment)
In-App Messaging	Remote Config
Performance Monitoring	

## **Paid Firestore products with limited free quota**

No matter which Firestore pricing plan your project uses, you get no-cost usage quota for the following Firestore products. If your project is on the Blaze plan, you also get pay-as-you-go pricing for additional usage.

Authentication (phone)	Cloud Storage	Realtime Database
Cloud Firestore	Hosting	Test Lab

For full details about the Firestore pricing plans and limits → [Firestore pricing page](#). This link also includes a calculator to get an estimate for your monthly costs on the paid plan (Blaze plan).

## Firestore Free Quota

Cloud Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud.

Only the **(default)** database qualifies for the free quota.

Free tier services	Quota
Stored data	1 GiB
Document reads	50,000 per day
Document writes	20K writes/day
Document deletes	20,000 per day
Network egress	10 GiB per month

We can find all other firebase product quotas [here](#)
